UniCover Flex

UniCovers Flex are the right solution for any document presentation. They have a crystal-clear sheet in one end and a matt-frosted finish on the other side. With the UniBinder binding systems you can bind and crimp the spine for an optimal fit.

UniCover Plus

The UniCover Plus has an extra sheet of paper on the glossy side of the cover, "OK Paper". The OK paper is actually the first page during the binding, crimping and cooling process. It makes sure that the real first page of the presentation doesn't get the static electricity of the Crystal sheet, and glides by itself in the liquid resin.
